Part 1:

For this assignment ask the user their favorite car brand is and their favorite car from that brand then store them into respective variables

Part 2:

Print the variable in a statement as a string in the format:
"(Car) is my favorite car made by (Brand)"

Here's a hint to how you would do this:
var1 = "Hello"
var2 = "Boo"
print(var1 + var2) -> "HelloBoo"
print(var1 + " " + var2) -> "Hello Boo"

Part 3:

Now print that statement 5 times.

Expected Output for part 1 & 2
